Staffordshire's Number 1 Roof Cleaning Service

Find us on Google, Facebook & Instagram

An introduction to Softwashing..

Softwashing is a method of cleaning which consists of using a mixture of low pressure & specialised chemicals to clean exterior hard surfaces. Softwashing safely removes the staining caused by micro-organisms such as algae, lichen, mould & moss, which commonly grow on roofs, walls, driveways & patios. It is so named to differentiate the method from pressure washing.

Our Roof Cleaning process explained..

Roofs can become very unsightly due to organic growth such as moss, mould, algae & lichen. The safest and most effective way of cleaning your roof is to remove the moss and apply a Softwash treatment to kill off the remaining organic growth. Our ever popular roof cleaning service is also a fantastic way of prolonging the life of your roof. Moss is the number one cause of roof degradation, due to the nature in which it roots into the surface of the tiles and grows in between the tiles.

Our services come fully insured & guaranteed and our team are fully trained & certified in the safe use of chemicals for exterior hard surface cleaning. Therefore you can rest assured your property is in safe hands with us.

For more information or to book a survey of your property, call us today.
